Career Goal

I want to become a proficient backend developer that not only grasps the fundamentals of the field but also recognizes the value of the product and makes a direct contribution to organizational objectives. I'm seeking a professional and growth-oriented setting where I can gain practical experience from real-world projects, learn from skilled coworkers, take on challenging tasks, and hone my system design and problem-solving abilities. My long-term objective is to develop into a technical or senior leadership position while creating dependable, scalable backend systems.

Skills

- **Backend Development:** RestfulAPI with .NET, WebSocket, third-party integrations (auth, payments, chatbots)
- **Programming & Database:** C#, PostgreSQL, SQL Server, ORM (EF), Angular, Tailwind.
- **DevOps & System:** Docker, CI/CD, Swagger, Git, cloud deployment (Vercel, Azure)
- **Collaboration:** GitHub Project, cross-functional teamwork
- **Soft Skills:** Technical communication, problem solving, adaptability, time management

Education

Sep, 2021 – Nov, 2025

Major: Software Engineering

at FPT Quy Nhon University AI Campus

GPA: 3.1/4

Experience

Dec, 2025 - Feb, 2026

Trava - Building a Task Management Application

- **Intern TMA | Role:** Backend & Frontend Developer | **Team size:** 1
- Developed a full-stack task management platform for workspace collaboration, task tracking, and team engagement by invitation and notification.
 - Built RESTful APIs using .NET, C#, applying Clean Architecture and CQRS.
 - Designed PostgreSQL database for multi-role system; implemented JWT authentication and Redis caching to improve performance.
 - Frontend built with Angular 18, Tailwind CSS, PrimeNG.
 - Managed source code via GitHub; deployed Backend on Azure and Frontend on Vercel.
- **Github Repo:**
 - Source Code: <https://github.com/ndmthuan97/trava>
 - Website: <https://trava-frontend.vercel.app/>
 - Account Admin: admin@fpt.edu.vn | Admin@123

May - Aug, 2025

PhyGen - Building an AI-powered Application for High School Physics Exam Generator

- **Capstone Project | Role:** Backend Developer | **Team size:** 5
- Developed a scalable web platform for generating high school Physics exams manually or automatically using AI, aligned with the 2018 national curriculum framework.
 - Built RESTful APIs using .NET, C#, applying Clean Architecture and CQRS.
 - Designed relational database with PostgreSQL for a multi-role system (Admin, User).
 - Integrated JWT authentication, Google Gemini AI, and ChatGPT for automated question and topic generation.
 - Implemented matrix validation logic, peer review workflow, chatbox, and automated email system.
- **Github Repo:**
 - Backend: https://github.com/ndmthuan97/PhyGen_BE
 - Frontend: https://github.com/tuyenhttp/PhyGen_FE

Jan - Mar, 2025

TimeSwap - Build a Job Posting/Search Application for Recruiters/Candidates.

- **Project at University | Role:** Backend Developer | **Team size:** 6
- Developed a recruitment platform connecting employers and candidates efficiently and transparently.
 - Built scalable RESTful APIs using .NET, applying Clean Architecture and CQRS.
 - Designed PostgreSQL database for multi-role system (Admin, Recruiter, Candidate).
 - Integrated JWT authentication, Redis caching, and automated email workflows.
 - Implemented core business logic to optimize employer-candidate matching process.
- **Github Repo:**
 - <https://github.com/tranduckhuy/time-swap>

May - Aug, 2024

Content Migration Project – Adobe Experience Manager (AEM)

- **At FPT Software QN | Role:** Dev Migration | **Team size:** ~40
- Participated in a large-scale content migration project using Adobe Experience Manager (AEM), focusing on structured workflows and quality assurance within an enterprise environment.
 - Migrated and validated landing pages from legacy systems to AEM.
 - Ensured data consistency and content integrity across environments.
 - Followed task workflows using Jira, maintained QA checklists in Excel.
 - Gained practical experience in agile collaboration, team coordination, and enterprise-level communication
